

International Fund Services & Asset Management S.A.

has been the leading, independent fund trading platform in Europe ever since our company was established in 2001. As a pure B2B- fund service platform we offer client-tailored services to institutions throughout Europe. Highest technology-standards as well as maximum flexibility and individuality in performing our services paired with a unique form of personal advice and client care is the basic philosophy behind all our actions.

In order to accelerate growth, we are looking for an

Experienced PHP Software Engineer (m/f/d)

Key responsibilities

- Administration, conception, design and technical development of ifsam's self-developed core system application as well as several web-applications using PHP
- Analysis of customer requirements (internal and external) followed by the creation of technical concepts and designs
- Interface for technical translation between our clients and the relevant departments
- Creation and maintenance of technical documentation

The ideal candidate will

- hold a university degree in computer science or an equivalent qualification
- have extensive experience in the conception and implementation of web-based software, ideally in the area of finance
- have excellent knowledge of PHP and in-depth skills of JavaScript / jQuery, MySQL and Apache
- have knowledge of J2EE and Tomcat
- have very good knowledge of Java as an asset
- have good skills in integration and deployment tools
- be highly motivated to work independently in a demanding think tank environment
- be able to execute complex tasks with a high degree of autonomy
- have strong analytical skills and is results-oriented
- be a team player, customer-, solution-, and improvement-minded
- be fluent in German (corporate language) and English

We offer

- an inspiring and creative working environment in a young and dynamic team
- the possibility to work independently and creatively with the chance of co-designing the product by contributing your own ideas
- an attractive remuneration system

If this opportunity is the challenge you are seeking, please send your motivation letter together with your CV to hr@ifsam.lu.
