

International Fund Services & Asset Management S.A.

a financial services firm established in 2001 and regulated by the CSSF - is one of the leading independent fund trading platforms in Europe. As a pure B2B-fund service platform we offer client-tailored services to institutional clients worldwide. Highest technology-standards as well as maximum flexibility and individuality in performing our services mark our philosophy.

Research Analyst - Investment Office (m/w)

Job description

- Perform investment research with scientific methods
- Develop proprietary investment strategies and rating methodologies
- Contact companies and agencies who can provide useful financial data
- Interpret markets to conclude financial recommendations for clients
- Understand the needs of the clients in order to target research to their benefit
- Create clear and useful reports and recommendations for organisational use
- Advise internal and external clients to buy or sell products based on market insights
- Liaise with fund managers and network with industry professionals

Requirements

- Excellent quantitative and analytical abilities
- Experience in collecting, interpreting and organizing data
- Prior experience with programming languages in a data analysis context (Python, Stata, R, ...)
- Additional certifications such as Chartered Financial Analyst (CFA), Certificate in Quantitative Finance (CQF) and similar certifications are considered a strong asset
- Firm grasp on portfolio theory and strong interest in cutting edge research
- Ability to prepare extensive reports and present findings to internal and external clients with clear and concise action advice
- Advanced speaking and report-writing skills for effective communication
- Attention to details and a commitment to accuracy

We offer

- an inspiring and creative working environment in a young and dynamic team
- the possibility to work independently with the chance of being part of a growing research team
- an attractive salary
